

OPTIMISATION AND CONTROL OF PHYSICAL TRAINING TO ENHANCE HEALTH AND PERFORMANCE

We offer the possibility of scientific consultancy and services to improve physical performance and/or health for different population groups (pensioners, young people, etc.) and sports teams. The very latest materials and technologies will be used to control and track physical effort, and leasing normobaric hypoxia equipment to simulate altitude training will be used.

Main feature / technology

Extensive catalogue of services for precise control and tracking of physical training using assessment equipment (potentiometers, body composition, oxygen consumption, muscle oxygen saturation), as well as normobaric hypoxia generators for simulated altitude training.

Main applications and advantages :

A group of sports science professionals will conduct a scientific and exact study of your physical effort, your fatigue, and your recovery from exercise.

Status of the technology:

Available on the market

Area:

Health and wellness
