

PROJECT MANAGEMENT TRAINING

Specialist services for training companies and public bodies in traditional project management and agile frameworks. Project management helps organise the intellectual work linked to R+D+I, thus enhancing capacity for innovation and organisational competitiveness.

Característica principal / tecnología

Specialist training service, based on best practices, incorporating the latest trends in gamification and situational experiences (role plays). This ensures that theoretical knowledge is carried over to real work situations.

Principales aplicaciones y ventajas :

Extremely useful knowledge for professionals in both traditional industries and for organisations dedicated to R+D. The principal advantage of this service is that it is available in both classroom and virtual formats, and either recorded or live-streamed.

Estado de la tecnología:

Disponible para demostración

Área:

Digital transformation
